U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing, Subscription and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

1977 Subscription rate $220.00 (including postage and insurance)
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.
Orders should be sent to the Subscription Fulfillment Manager Headington Hill Hall, Oxford, OX3 0BW

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

LIST OF CONTENTS

Vol. 15 1975

Number 1

V. V. IVANOV: Algorithms of optimal accuracy for the approximate solution of operator equations of the first kind . . . 1
YU. N. KHUDAK: On regularizing algorithms . . . 9
V. V. VASIN and V. P. TANANA: On the stability of projection methods for solving incorrectly posed problems . . . 16
D. F. DAVIDENKO: An iterative method of parameter variation for inverting linear operators. . . . 27
V. I. LEBEDEV: Values of the nodes and weights of ninth to seventeenth order Gauss–Markov quadrature formulae invariant under the octahedron group with inversion 44
A. M. TER-KRIKOROV: Some linear problems of optimal control theory with phase constraints . . . 51
A. V. LOTOV: A numerical method for constructing sets of attainability for linear controlled systems with phase constraints . . . 63
V. V. FEDOROV: The stability of the problem of determining a multiple maximin 75
G. M. VAINIKKO: Convergence of the difference method when seeking the periodic solutions of ordinary differential equations. . . . 83
YU. G. EVTUSHENKO and V. G. ZHADAN: Application of the method of Lyapunov functions to the study of the convergence of numerical methods . . . 96
I. V. FRYAZINOV: On a class of schemes for a parabolic equation . . . 108
V. I. IVANOV: The short-wave asymptotic behaviour of the scattering diagram and total scattering cross-section of a smooth convex cylinder . . . 121
A. A. ARSEN'EV: Global existence of a weak solution of Vlasov's system of equations 131
L. S. KLABUKOVA: An approximate method of solving the mixed boundary value problems of the theory of momentless elastic spherical envelopes . . . 143
V. M. KRIVTSOV, I. N. NAUMOVA, YU. D. SHMYGLEVSKII and N. P. SHULISHNINA: Check of two methods of calculating radiative transfer . . . 158
A. M. BISHAEV and V. A. RYKOV: Solution by an iterative method of stationary problems of the kinetic theory of gases at moderate and low Knudsen numbers . . 166
K. I. BABENKO, N. D. VVEDENSKAYA and M. G. ORLOVA: Calculation of the steady flow of a viscous fluid past a circular cylinder . . . 176
O. M. BELOTSERKOVISHII, V. A. GUSHCHIN and V. V. SHCHENNIKOV: Use of the splitting method to solve problems of the dynamics of a viscous incompressible fluid . . . 190
YU. A. BUDYANSKII, A. V. KUDRYA, N. I. OGURTSOV and A. A. CHEKASIN: Determination of a seismic section by the wave reflection method . . . 200
S. A. GABOV: Application of L. N. Sretenskii's method to a problem of the theory of waves in channels . . . 208

Short Communications

O. M. MAKAROV: The connection between two multiplication algorithms . . . 218
M. A. SHESHKO: Representation of Cauchy type integrals with a power singularity by special functions . . . 223
G. N. GEGEL': A quadrature formula for a four-dimensional sphere . . . 226
B. L. GRANOVSKII: A method of constructing quadrature formulas for a circle . . 229
R. D. BAGLAI and K. K. SMIRNOV: The computer processing of two-dimensional signals. . . . 234
A. G. KOVALENKO and V. G. OVCHINNIKOV: An additive non-linear programming problem . . . 241
W. VOIGT: A variant of the pivotal condensation method for systems with connected boundary conditions . . . 245
M. N. MOSKAL'KOV: A property of a scheme of higher order of accuracy for the one-dimensional wave equation. . . . 249
B. A. VELIKSON: Solution of a non-linear integro-differential equation. . . . 256
O. A. MAKHOTKIN: Difference schemes for Kolmogorov's direct equation . . . 259
E. F. LIMAR: Calculation of the flow of a rarefied gas past a cylinder . . . 264
Book Reviews. . . . 268

Number 2

YA. A. AL'BER and I. P. RYAZANTSEVA: Regularization of non-linear equations with monotonic operators. . . . 1

A. V. GONCHARSKII, A. S. LEONOV and A. G. YAGOLA: Applicability of the disparity principle in the case of non-linear incorrectly posed problems, and a new regularizing algorithm for solving them 8
T. I. SAVELOVA: The regularization of integral equations of the first kind of the convolution type 16
R. D. BAGLAI: A criterion for choosing the regularization parameter based on evaluation of a sensitivity function 23
S. M. SHVARTIN: An algorithm for planning transport in minimum time 38
V. V. PODINOVSKII: Multi-criterion problems with uniform equivalent criteria . . 47
M. YUNUSOV: The solution of an optimal problem of Stefan's type 61
V. A. GURVICH: The solvability of positional games in pure strategies 74
S. V. ZUNDELEVICH and L. A. OGANESYAN: Variation difference schemes on a regular mesh for the biharmonic equation 88
B. S. ELEPOV and V. P. IL'IN: On a combination of a difference algorithm with the Monte Carlo method 99
V. P. GORELOV, V. I. IL'IN and V. M. POVYSHEV: On the probability of neutron absorption in plane and spherical blocks 105
YU. A. KUZNETSOV and S. F. MOROZOV: Convergence and stability of Rothe's method of solving a non-stationary system of reactor kinetic equations 117
S. I. KHUDYAEV: Some approximate methods of radiation transfer theory 125
YU. N. KARAMZIN: Difference schemes for calculating the three-frequency interactions of quasi-monochromatic waves allowing for diffraction 142
E. L. TARUNIN: The method of a sequence of nets for free convection problems 148
YU. A. DEM'YANOV and V. V. FEOKTISTOV: Application of the method of integral relations to the solution of a singular equation of parabolic type in boundary layer theory 157
A. M. GORELIK: A source language of an incremental Fortran compiler 167
V. F. KRIVOROTOV: An algorithm for finding the optimal path on a network with bans 177
BACH HUNG KHANG: Partition of a type of structure into chains 186

Short Communications
E. L. ZHUKOVSKII and R. SH. LIPSTER: The computing of pseudo-inverse matrices 198
V. G. BUN'KOV: A combined method of determining the zeros of a polynomial . . 202
A. D. LIZAREV, V. U. OGNEV and N. B. ROSTANINA: Associated Legendre functions of arbitrary complex degree 206
V. M. GORLOV: The construction of attainability sets for a minimal-time problem 212
V. V. FEDOROV: The necessary optimality conditions in a game with the transfer of information 217
A. I. TKACHENKO: Increasing the accuracy of integration of a system of differential equations 221
A. I. VOVK: Convergent iterative processes for solving some non-linear integro-differential equations 225
N. N. KALITKIN and I. D. RODIONOV: Calculation of one-dimensional quantum mechanical scattering 231
G. B. AKHMETOV and I. E. MIKHAILOV: Construction of iterative processes using implicit three-dimensional schemes of the method of characteristics 235
A. I. IVANDAEV: A method of introducing "pseudoviscosity" and its use for improving the difference solutions of hydrodynamic equations 238
A. N. MINAILOS and A. I. TOLSTYKH: Implicit high-accuracy finite-difference schemes for the "shock capturing" calculation of discontinuous solutions 242
V. M. KRIVTSOV, I. N. NAUMOVA and YU. D. SHMYGLEVSKII: The possibility of the preferential radiative heating of internal regions of a substance 247
Book Reviews 251

Number 3

I. N. MOLCHANOV and M. F. YAKOVLEV: Iterative processes for solving a class of incompatible systems of linear algebraic equations 1
E. L. ZHUKOVSKII and I. N. ZAINKIN: Numerical statistical algorithms for finding the quasi-solutions of conditional systems of linear algebraic equations 12
V. A. ZHELUDEV: The approximate solution of a class of equations in convolutions by means of splines 26
V. F. DEM'YANOV: A continuous method for solving minimax problems 45

V. A. GORELIK and V. V. FEDOROV: The external point method in the constrained multiple maximin problem 52
L. GERENCHER: Numerical methods in the theory of games 61
I. G. POSPELOV: Numerical methods for solving linear multi-step games 68
G. P. GUSHCHIN and A. V. SERGIEVSKII: On the numerical integration of a system of linear equations when the derivative contains a small parameter 79
YU. A. EREMIN and A. S. LEONOV: The construction of stable difference schemes for second-order alternating linear differential operators 86
I. V. FRYAZINOV: An approximation of mixed derivatives 95
YU. I. MOKIN: Two-layer parabolic and weakly parabolic difference schemes . . . 111
G. V. VOSKRESENSKII and A. I. PLIS: A constructive method, based on factorization for solving boundary value problems of diffraction at bodies of finite size 122
V. N. KOTEROV: Transonic flows of a radiating gas in channels 130
V. I. GOLIN'KO: Solution of the Cauchy problem for a plane one-dimensional isentropic gas flow in a constant gravitational field 143
P. P. VOLOSEVICH and E. I. LEVANOV: Solution of the self-similar problem of the outflow of a gas into a vacuum in the two-temperature hydrodynamic approximation 150
L. I. GONCHAROVA: Precedence analysis and context conditions 161
A. M. GORELIK and E. V. KHUKHLAEV: Implementation of the incremental Fortran compiler 175
A. S. PODKOLZIN: The existence time of configurations in homogeneous structures 183
Z. E. KOROLEVA: Comparison of test recognition algorithms 195
V. F. KRIVOROTOV: An algorithm for the classification of sequential processes with the distribution of decision-making by some hierarchy 202

Short Communications

N. N. KALITKIN and L. V. KUZ'MINA: Interpolation formulas for Fermi–Dirac functions 213
N. V. MUZYLEV: An algorithm of simplified regularization 218
L. P. YANOVSKII: The iterative solution of second-order differential equations with monotonic non-linearities 223
I. I. KOCHETOV: A method of solving exterior boundary value problems for second-order elliptic equations. 227
YU. N. DROZHZHINOV and N. I. KOZLOV: Asymptotic behaviour of the solution of the wave equation with a piecewise-discontinuous coefficient 230
G. M. KOBEL'KOV: A numerical method of solving the Stokes problem 235
D. A. MOLODTSOV: A class of non-antagonistic games 239
V. I. PROKOPÉNKO: A game with a "sluggish" partner 246
G. A. ATANOV: Calculation of a hydrodynamic cumulation 251
L. Z. SHAUTSUKOVA: Evaluation of the information of functional indicators and combinations of them in the course of treatment 255
Scientific Information 258

Vol. 15 1975

Number 4

V. A. VINOKUROV: Properties of the error functional $\Delta(f,R,\delta,x)$ as a function of x with fixed δ.I 1
R. D. BAGLAI: On the identification of non-linear operators 16
G. D. MAISTROVSKII and YU. G. OL'KHOVSKII: The rate of convergence of the method of steepest descent in the constrained minimization problem 29
V. N. GORBATENKO: *F*-Convex functions, their properties and applications to the solution of extremal problems 45
L. D. AKULENKO and F. L. CHERNOUS'KO: The averaging method in optimal control problems 54
V. A. GORELIK and V. V. FEDOROV: The interior point method in the constrained multiple maximin problem 67
V. E. BRYKSIN: On a mesh method for estimating the efficiency of strategies based on partial information about the conditions of the operation 80
WANG TAN CHU and S. YA. STEPANOV: Stabilization of controlled motions in a finite time interval. 91
V. P. GRIGORENKO, V. N. SMIRNOVA and M. L. TAI: A method for solving non-linear boundary value problems describing the minority carrier distribution in the base of a semiconductor structure 107

N. N. GUDOVICH: A new method for constructing stable finite-difference schemes of any previously assigned order of approximation for linear ordinary differential equations . . . 115
N. A. DRAGIEVA: Solution of the wave equation in a domain with moving boundaries by Galerkin's method . . . 130
G. I. KURCHENKOVA, V. I. LEBEDEV and E. S. TSAPELKIN: Galerkin's method for diffusion equations . . . 141
M. DRYYA: Absolute stability of difference schemes with a split operator for systems of parabolic and hyperbolic equations in convex regions. . . . 149
L. F. YUKHNO: Numerical solution of systems of difference equations in the theory of filtering . . . 160
V. V. ALEKSANDROV and G. L. STENCHIKOV: A self-similar strong explosion with a weak radiative effect . . . 168
A. A. CHARAKHCH'YAN: A numerical scheme for the transfer equation on an optically coarse net . . . 181
S. S. LAVROV and A. A. ORDYAN: An extension of Knuth's algorithm for parsing context-free languages . . . 187
L. Z. SHAUTSUKOVA: Solution of a classification problem by the method of calculation estimates . . . 200

Short Communications

PHAM VAM AT: Convergence of the Jacobi and Gauss–Seidel iterative methods . . 210
S. A. ABRAMOV: The rational component of the solution of a first-order linear recurrence relation with a rational right side. . . . 216
A. V. VILKOV, N. P. ZHIDKOV and B. M. SHCHEDRIN: A method of finding the global minimum of a function of one variable . . . 221
R. P. FEDORENKO: The incorrectness of optimal control problems and the regularization of the numerical solution . . . 224
O. V. VASIL'EV and A. I. TYATYUSHKIN: The calculation of the optimal programmed control in a problem with distributed parameters . . . 229
A. M. DENISOV: The approximate solution of a Volterra equation of the first kind 237
V. YA. RIVKIND and B. S. EPSHTEIN: Net schemes for the Navier–Stokes equations associated with projection. . . . 240
A. A. ARSEN'EV: Asymptotic behaviour of the energy emitted by an almost periodic source of oscillations . . . 246
G. M. KOBEL'KOV: Estimation of the rate of convergence of a difference scheme for a contact problem of elasticity theory . . . 251
G. A. ATANOV and L. A. KUNITSYN: Interaction between a shock wave in water and a ring diaphragm . . . 255
V. M. BORISOV and A. D. LITVINOVICH: A method of numerical integration for stationary problems of transport theory. . . . 258
L. I. KICHA and E. I. LITVAK: An algorithm for enumerating simple chains in a graph . . . 264
E. G. KUL'YANOV: An algorithm for finding the maximal upper zero of an arbitrary monotonic function of the algebra of logic. . . . 267
Book Reviews. . . . 270

Number 5

O. M. MAKAROV: The connection between algorithms of the fast Fourier and Hadamard transformations and the algorithms of Karatsuba, Strassen, and Winograd . . 1
FAM VAN AT: Reduction of an irreducible non-negative matrix to quasi-stochastic form by the method of similarity variation . . . 11
A. A. BELOLIPETSKII: The sensitivity of linear time-optimal systems to weak phase constraints . . . 19
V. V. FEDOROV: Optimization problems with an ordered set of constraints 32
M. M. RUBINOV: Necessary and sufficient conditions for a game to have a value 45
I. S. MEN'SHIKOV: Three-person games with a fixed sequence of moves 55
L. T. ASHCHEPKOV and O. V. VASIL'EV: On the optimality of singular controls in Goursat–Darboux systems . . . 63
L. F. YUKHNO: On convergence of Rothe's scheme for certain non-linear evolutionary equations . . . 73
YU. I. MOKIN: On weakly parabolic two-layer schemes in some classes of non-uniform mesh . . . 89

O. M. BELOTSERKOVSKII and V. E. YANITSKII: The statistical particles-in-cells method for solving rarefied gas dynamics problems . . . 101
V. E. TROSHCHIEV: On the mathematical properties of S_n-methods for solving kinetic equations . . . 114
M. YA. IVANOV: Solution of two- and three-dimensional problems of transonic flow over bodies . . . 127
S. BUDNYAM and E. P. ZHIDKOV: Analysis of the steady state of an electron ring in an external magnetic field . . . 143
V. A. KUZYUK and A. KH. RAKHMATULINA: Asymptotic problems of electron transport theory . . . 149
F. P. ONUFRIEVA: A computational method in the spectral analysis of the harmonic oscillations of a crystal lattice . . . 163
L. S. KLABUKOVA: The correctness of boundary value problems in the theory of momentless thin elastic shells of positive curvature and their solution by the mesh method . . . 176
A. A. ORDYAN: Total precedence languages and ELR(1)-languages . . . 190
V. K. LEONT'EV: Stability of the travelling salesman problem . . . 199

Short Communications

M. V. AREF'EVA: Some asymptotic optimal error estimates for convolution type integral equations of the first kind . . . 213
N. A. MAGNITSKII: A method of regularizing Volterra equations of the first kind 221
B. A. BEL'TYUKOV and G. SH. NUTFULLINA: Estimation of the error of the numerical solution of a non-linear integral equation . . . 228
V. G. PRIKAZCHIKOV: Strict estimates of the rate of convergence of an iterative method of computing eigenvalues . . . 235
S. I. SERDYUKOVA: The stability of difference boundary value problems with inclined characteristics of constant sign . . . 240
R. P. FEDORENKO: A difference scheme for Stefan's problem . . . 246
A. A. ARSEN'EV: Existence and uniqueness of the classical solution of Vlasov's system of equations . . . 252
M. M. GOLOMAZOV and A. P. ZYUZIN: A numerical method of computing the three-dimensional flow past blunt bodies with a detached shock wave . . . 259

Scientific Information

V. I. BYKOV and E. A. IVANOV: Second All-Union Symposium on Mathematical Methods in Chemistry . . . 266
Book Reviews . . . 267

Vol. 15 1975

Number 6

The Seventy-Fifth Birthday of Mikhail Alekseevich Lavrent'ev . . . 1
V. A. VINOKUROV: Asymptotic error estimates—II . . . 3
T. I. SAVELOVA: The regularization of systems of linear integral equations of the first kind of the convolution type . . . 15
A. K. SHUVAEV: Delta methods for numerical inversion of the Laplace transform, and their convergence . . . 22
A. E. UMNOV: The method of penalty functions in problems of high dimensionality 32
V. V. FEDOROV: The instability of linear programming problems . . . 45
V. P. BELUKHIN: An expansion principle and a method of reducing the discrepancies for problems of linear dynamic programming . . . 59
A. B. YADYKIN: A parametric method in problems of quadratic programming with a degenerate quadratic form . . . 71
A. G. SLEPTSOV: The convergence of a method of local collocation for ordinary differential equations . . . 82
K. V. EMEL'YANOV: A difference method for solving the third boundary value problem for a differential equation with a small parameter in its leading derivative . . . 92
V. B. ANDREEV and E. YU. ARKHIPOVA: The solution by difference schemes of Laplace's equation with discontinuous boundary conditions of the first kind . . . 100
V. V. NEKRASOV: A method of characteristics for the numerical solution of multi-dimensional boundary value problems . . . 116
V. V. POTKIN: Kinetic analysis of difference schemes for gas dynamics . . . 126
P. P. BELINSKII, S. K. GODUNOV, YU. B. IVANOV and I. K. YANENKO: The use of a class of quasiconformal mappings to construct difference nets in domains with curvilinear boundaries . . . 133
S. A. GABOV, P. I. RUBAN and S. YA. SEKERZH-ZEN'KOVICH: Diffraction of Kelvin waves by a half-finite wall in a semi-bounded basin . . . 144

V. G. GRUNDNITSKII and YU. A. PROKHORCHUK: Analysis of the diffraction of a shock wave at a curvilinear surface 157
E. D. TERENT'EV and YU. D. SHMYGLEVSKII: The complete system of divergent equations of the dynamics of a perfect gas. 167
V. M. BORISOV: Continuous shock waves in an ideal radiating gas 177
O. M. BELOTSERKOVSKII and V. E. YANITSKII: The statistical method of particles in cells for the solution of problems of the dynamics of a rarefied gas—II. Computational aspects of the method. 184
V. K. LEONT'EV and A. N. NURLYBAEV: A class of systems of Boolean equations 198

Short Communications
YA. A. FURMAN: An estimate of the limit of the characteristic numbers of a real matrix of general form 211
I. P. PETROV and A. V. TIMOFEEV: Finitely-convergent recurrent algorithms for solving target inequalities with constraints 214
I. P. MYSOVSKIKH: On Chakalov's theorem 221
V. M. VERZHBITSKII: Choice of parameters in theorems of the convergence of an approximation analog of Newton's method 228
S. A. ORLOVSKII: Equilibrium situations in coalitionless games with constraints . . 232
YU. P. BOGLAEV: The boundary layer in the solutions of non-linear Volterra integral equations perturbed by a singularity 238
V. B. GLASKO, M. V. ZAKHAROV and A. YA. KOLP: Applications of the regularization method to solve an inverse problem of non-linear heat-conduction theory . . 244
Book Reviews. 249
